

The women applicant of asylum is the one who leaves his or her country for political and other reasons in order to find safety and protection in another country.

Most the time their requests for asylum are rejected under the pretext that they are apolitical. However we find in their countries of origin many women who occupy the important fonctions in the hierarchie of politicals paries and the administrations (ministers, members of parliament, mayors...) The women as the mother of humanity plays an important role in the destiny of the country.

As we all know the woman as the mother of the humanity gives birth and takes care of the education and the morality in the family and the society. Unfortunately

In Europe and in Germany in particular the women applicant of asylum is rejected and considered not more than an object; Just like men, the women applicants of asylum seekers are victims of discrimination and racism in Germany, and quite worse they undergo treatments too much unworthy: insults aggression, intimidations and humiliations are the daily batch.

Racism

This is racial discrimination that abuses human rights the can be defined as a belief that race is the primary determinant of human traits and capacities and that racial differences produce and inherent superiority of particular race. She is being rejected in her local environment, aggressed, humiliated and the non integration in the society. Take example of a woman living in an isolated asylum home with children where there is no condition of normal growth and education for this children. what about the young girl (2 years) when she saw another child or the playground of child or new

people she states to cry and call the mother all this because she stay in forest and have the only friend the mother. An other example is of a women with 4 children was removed from the asylum home and now she is under the pressure of being deported with the 4 children If i mag ask what is then the futur of these children?

As far as medication is concern we have realised racism in intensive abortion, miscarriages and interruptions pregnancies. What about those pregnant women who took the wrong or expired medicines are administred to them and the result is the lost of the baby; That is why many women do not go to the hospital for consultation before 6 months pregnancy; for instance take the case of these women giving birth by caesarean (operation) pretending that they can not do it in normal way. The true is the doctor are running after the bonus.

What about this women who refused to leave the doctor cut your stomach after sometimes she born wit any problems. Many women are being sensibilized by the medical offfficials against pregnancy pretening they could stay young and healthy prevented from ageing. When we know that the fondamental reason is to prevent the white race from the pollution of other race.

sexual abuse

This is another abuse of humanity. Many woman are victims of sexual abuses. They are being raped and abandoned many woman are forced to accept this sexual abuses because they don't have anybody to help them. there fare they continued to lived in this mess and tragedy. Emagine 5 women put in 4 by 4 aquar meter room using the same toilets. In fact no privacy and exposing themselves many diseases from

others. Take the case of this woman who was sexually abused and brutalised by the security man in Eisenhüttenstadt in the night in her room.

During the mobilisation in the differents asylum homes they are realised many women are infected and they having wrong traitment.

No integration

Political a female asylum seeker is rejected what is then women integration?

Concerning communication women have language barrier since they don't have money to pay for language course and pretend to be illetrates meanwhile they are not. How they can give of somebody who don't read, understand German, the paper who is wrote in this language.

Take the case of those woem who having man good ideas and potentiality but because the language not have the opportunity to make schooland realised their projet.

How can we say that we are in a society whereby human right is respected when people are being put into deportation camps without any criminal offence, and later transported in their various countries like luggages.

A women with 7 months pregnancy when to declare her pregnancy but one week later her identity card was seized and given 8 days to leave Germany she is being threatered for deportation. she was asked to give the address of her baby father if not her food money will be reduced. in fact all this stre Ass is to make her lost her baby.

Conclusively female asylum seeker are victims of many problems and their rights are not respected there fare we the women of FIB have decided to:

- Mobilised and sensibilised women in the different asylum homes to let know their rights
- Organised meetings of female asylum seekers and different groups of german women to bring out problems and look for solutions
- Prevent the deportation of this woman with 4 children
- Close down the asylum home where a woman is traumatised with her baby and be transfered to the city
- Create children play grounds in asylum seeker homes
- Exposed and solved the problem of women
- Close the deportation camp

After our visit to different asylum we realised that women have particular problems to be discuss within them and look for solution since woman are always very due to the many humalitions and intimidattion
